

PRESENTING SIGNATURE-I

ABOUT US

- Ukab Aerospace is a start-up that originated from BIET Jhansi, Uttar Pradesh in 2022.
- Our primary goal is to tackle reliability and cost challenges in drone manufacturing, with a mission to deliver lightweight, cost-effective drones for public & private use while prioritizing reliability. Leveraging our team's expertise, we integrate cutting-edge materials, technology, and AI to overcome these hurdles.
- The start-up is supported by a team of over 7 passionate engineers with a cumulative experience of 33+ years in various UAV industry domains. Our expertise allows us to efficiently plan, design, and test systems and subsystems, leading to cost reduction, improved reliability, and the integration of the latest field features. Furthermore, our team designs products with a focus on ease of manufacturing, maintenance, and quality control.

SIGNATURE-I

SIGNATURE-I is a micro-category drone designed to accommodate a High Definition RGB camera, ideal for tasks such as surveillance, industrial and tower inspections, and mapping. It includes live geo-tagging functionality. Moreover, it features a smart battery with safety measures, battery life cycle monitoring, and distance/altitude-based smart battery failsafe capabilities.

FEATURES

Easy Assembly &
Disassembly

Operable by Single
Person

Automatic Take-off
& Landing

Smart Battery
Failsafe

AI Smart
Identification &
Tracking

Failsafe for
Communication Loss

Easy to Carry

Geo-Fencing
(Inclusion/Exclusion)

TECHNICAL SPECIFICATIONS

Up to 45 minutes
Endurance

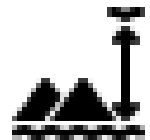

36 km/h or 10 m/s
Speed

10 km
Range

Under 1 kg
Weight

120 m or 400 ft.
Operational Altitude

2500 m AMSL
Service Ceiling

-10°C to 55°C
Temperature

36 km/h or 10 m/s
Wind Resistance

CAMERA FEATURES

4K Ultra Video
Recoding

Starlight Night
Vision

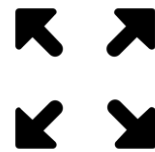

Ultra Low
Latency

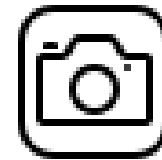

Diagonal: 93°
Horizontal: 81°

3-Axis Gimbal

6x Digital Zoom

HD photoshoot

Up to 128 GB
Storage Support

POWERFUL IMAGING SYSTEM

SIGNATURE-I carries an 1/1.7-inch Sony image sensor, an 8 megapixels CMOS with remarkable photosensitive ability, impressive 4K recording and photography. Up to 6x digital zoom. The scenery is clear, making it easy to produce amazing aerial images.

AI MONITORING AND TRACKING

Human ,Vehicle & Boat Recognition

SIGNATURE-I supports target recognition and tracking based on artificial intelligence technology, automatically recognizes and records pedestrians, vehicle (including cars, trucks, and buses), and boats in the monitoring area.

Multi-target Recognition

SIGNATURE-I supports simultaneous monitoring of multiple targets in the monitoring area.

Gimbal Camera Collaborative Anti-lost Tracking

During the tracking process, if the target is blocked or briefly leaves the monitoring screen, this can automatically recognise and continue tracking when it re-enters the monitoring screen.

COMPETITIVE ADVANTAGE

Price

Price is an important concerns willing to buy

Ease of Use

Handheld Controller and Android Application for Monitoring and Control

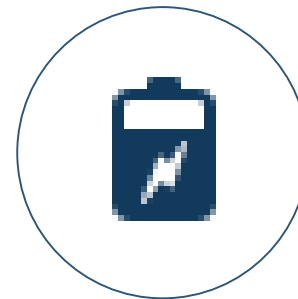

Packaging

Small Bag Packs,
Easy to Carry

AI Tracking

Human, Vehicle & Boat
Muti-Target Recognition

Smart Battery

Enabling UAV Safety &
Increased Endurance

Light Weight

The Indigenous Design has
offered an Opportunity to
Optimize both Size and Weight

COMPETITION

THANK YOU!
